

Abstract

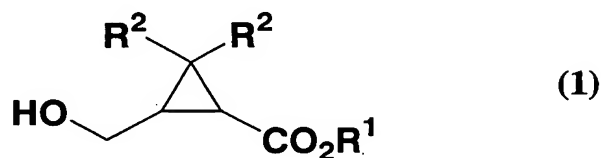

There is provided a production method of formylcyclopropanecarboxylate compound of formula (2):

5 wherein R¹ and R² are as defined below,

which comprises reacting

a cyclopropanecarboxylate compound of formula (1):

10 wherein R¹ represent a linear, branched or cyclic alkyl group, a substituted or unsubstituted aryl group, or a substituted or unsubstituted aralkyl group,

R² represents a hydrogen atom or a methyl group, with at least one oxidizer selected from the group consisting of hypohalite, N-halosuccinimide, a trichloroisocyanuric acid, and iodine,

15 in the presence of a nitroxy radical compound.
